

IChemE: Institution of Chemical Engineers

Energus is fully committed to your professional development and we strongly encourage all graduates to begin their chartered/professional development journey during their time on the programme. With our dedicated People and Skills Team, support network and partners, we will work together to ensure your programme delivers a broad range of experiences, qualifications, and training to enable you to take the next step in your professional development.

The Nuclear Graduate programme has achieved 'Accredited Company Training Scheme' status through IChemE and we will support you to work toward reaching the competency requirements throughout the programme. Nuclear Graduates will support the funding of your IChemE membership. Through the programme you can shape your own development and receive support from Energus, your sponsor, your mentor, line manager and senior coordinator.

The Institution of Chemical Engineers is a recognised qualifying body for chemical, biochemical and process engineers. Their purpose is to aid the development of chemical engineering professionals and provide support in applying your expertise and experience. As a member of IChemE, you have access to networking opportunities and resources that keep you up to date with the developments in your field and supports your professional development.

Registration Process:

- 1** The first step toward registering is to decide which chartership route you want to pursue based upon your discipline, role and career aspirations.
- 2** Following this you will need to register with your chosen institute and send confirmation and invoice to peopleandskills@energus.co.uk. (Info on how to apply can be found here: <https://www.icheme.org/membership/membership-grades/chartered-member/how-to-apply/>)
- 3** On the People and Skills Programme Management System you need to log which institute you have registered with and provide your membership number.
- 4** Once you have registered and received your membership number, please email the P&S team inbox with those details and you will be registered onto the Nuclear Graduate IChemE ACTS (Approved Company Training Programme) by the P&S team.
