

Institute of Physics

Energus is fully committed to your professional development and we strongly encourage all graduates to begin their chartership/professional development journey during their time on the programme. With our dedicated People and Skills Team, support network and partners, we will work together to ensure your programme delivers a broad range of experiences, qualifications, and training to enable you to take the next step in your professional development.

The Nuclear Graduates programme has achieved formal accreditation through IOP and we will support you to work toward reaching the competency requirements throughout the programme. Nuclear Graduates will support the funding of your IOP membership. Through the programme you can shape your own development and receive support from Energus, your sponsor, your mentor, line manager and senior coordinator.

The Institute of Physics is a professional body recognised across the UK and Ireland and aims to promote physics around the world and make it accessible to everyone. They offer activities and resources which are able to assist in making informed decisions about your career choices. By becoming a member of the IOP, you have the option of the following professional registrations: Engineering Technician, Registered Scientist, Incorporated Engineer, and Chartered Scientist.

Registration Process:

- 1 The first step toward registering is to decide which chartership route you want to pursue based upon your discipline, role and career aspirations.
- 2 Following this you will need to register with your chosen institute and send confirmation and invoice to peopleandskills@energus.co.uk. (Info on how to apply can be found here: <https://membership.iop.org/>)
- 3 When you register with IOP you will be asked if you are currently on an 'ACTS'- ensure you note 'Nuclear Graduates' when prompted.
- 4 On the People and Skills Programme Management System you need to log which institute you have registered with and provide your membership number.
