

Royal Society of Chemistry

Energus is fully committed to your professional development and we strongly encourage all graduates to begin their chartered/professional development journey during their time on the programme. With our dedicated People and Skills Team, support network and partners, we will work together to ensure your programme delivers a broad range of experiences, qualifications, and training to enable you to take the next step in your professional development.

The Nuclear Graduates programme has achieved formal scheme accreditation through the RSC and we will support you to work toward reaching the competency requirements for MRSC/ CChem throughout the programme. Nuclear Graduates will support the funding of your RSC membership. Through the programme you can shape your own development and receive support from Energus, your sponsor, your mentor, line manager and senior coordinator.

The Royal Society of Chemistry aim to develop and celebrate professional capabilities by connecting scientists with each other and society. By becoming a member of the RSC, you gain access to new research, networking opportunities and new partnerships. Their new strategy sets out how they aim to help the chemical science community by teaching and learning, discovering and sharing, practising and accomplishing and allowing everyone to be heard.

Registration Process:

- 1 The first step toward registering is to decide which chartership route you want to pursue based upon your discipline, role and career aspirations.
- 2 Following this you will need to register with your chosen institute and send confirmation and invoice to peopleandskills@energus.co.uk. (Info on how to apply can be found here: <https://www.rsc.org/membership-and-community/join/>)
- 3 On the People and Skills Programme Management System you need to log which institute you have registered with and provide your membership number.
- 4 Following this you will then be issued with the registration form that will need to be returned to the P&S team to enable you to be registered on the Nuclear Graduates RSC accredited scheme.
